ADVANTAGES OF YUKON RIG MATS

1. Environmentally friendly and sustainable product
 - Image is everything in competitive markets.
2. Extremely durable and long lasting
 - Lasting up to 20 years.
 - Will withstand tracked equipment, pneumatic or chained tyres with very little or no tyre evidence of marking under normal use activities.
3. Safe
 - With the use of rubber matting, electrical conductive hazards are reduced compared to electrical work being carried out on steel platforms (lightning strikes & electrical shorts).
 - Rubber is excellent for providing a non-slip base, preventing slips and falls by employees.
 - Less snow and ice build-up, black rubber absorbs the sun's radiation and melts snow and ice even up to -15°C .
4. Minimal Flexibility
 - The mats have been tested and proven to have very little flexibility, even when loaded with heavy machinery over large subsurface ruts and crevasses.
 - Should the mats be accidentally dropped while handling, there are no concerns of breakage.
5. Insulating value R60
 - Rubber is a natural insulator, keeps the cold in the ground longer enabling the road to be in service for an extended period of time in the southern regions.
6. Resilient to absorbing liquids
 - Do not have to dry out mats, therefore less storage needed.
7. Easy maintenance
 - Easy to wash off, therefore less labour intensive and a cost saving.
8. Shock Absorption
 - Rubber is a natural shock absorber that smooths out the ride, thus reducing fatigue on manpower and equipment.
 - Should electric equipment or machinery be dropped on the mats, it is less likely that the equipment would be damaged, saving expensive replacement costs.
 - Travelling noise is reduced.

ADVANTAGES OF YUKON RIG MATS (continued)

9. Traction control
 - Equipment is less likely to slip off the track to become damaged and caught in the terrain it is being protected from.
 - Ice and snow has been known to melt and dry off rubber surfaces at an increased rate when compared to other product surfaces.
10. Easy handling
 - The bevelled edge makes for an easy pick up for a loader.
 - Optional lifting lugs can be installed.
11. Rubber won't bond to ice
 - Less time to handle.
 - Less damage than traditional wood.
12. Less damage to equipment and vehicles
 - No nails, less fat tyres.
 - No damaged protruding boards.
13. 100% Canadian manufactured, distributed under Exclusive Licence in Australia.

Feature Benefit Summary

- Reduces environmental impact due to ground disturbance.
- Provides support in wet, muddy, high aggregate terrain.
- Reduces expensive machinery repairs from getting stuck or hitting potholes.
- Reduces costly repairs to undercarriages from striking exposed objects.
- Reduces road construction costs.
- Saves time and money.
- Reusable and portable.
- Outlasts other mats on the market in terms of maintenance and repair costs.
