Agriculture Solutions

Our **Equine Grid, Cow Grid, Pig Grid, Sheep Grid** and **Chook Grid** products will provide permanent footing and flooring solutions for all your farming needs. Being naturally porous, the interlocking panel of hexagonal cells can be filled with dirt or gravel. Apply to a full paddock, or around key areas such as watering, feeding or gates.

The hexagon cells that make up each panel form a rigid honeycomb design that holds the subject matter in place providing maximum load bearing. All panels have an interlocking edge system that makes it a breeze to install, even on steep grades.

Stokbord is an extremely tough and durable, general purpose, value for money board made from 100% recycled plastic, including agriculture farm film. It can be fabricated and welded for a variety of applications, including stable lining, floors, walls and cladding, partitioning, sheep and pig pens, poultry houses, and cattle races, gates and fencing.

It's unique embossed finish provides a tough, durable, scratch resistant and waterproof product that offers long term cost savings compared to timber. This makes it ideal as a base for trailer linings. It is maintenance free and rot proof
