Caravan Park Flooring

GroundMate ground protection mats provide incredible value and efficient ground cover. Suitable for pedestrian and medium to heavy weight vehicular traffic, it is currently available in grey with an anti-slip tread pattern finish on one side and a 'diamond embossed' finish on the opposite side

GroundMate LT (lite) is a thinner mat designed to provide highly effective cover for hard, firm and/or decorative surfaces that need protection from vehicles, such as forklift and cart traffic. It is lightweight, cost-effective, simple to install and requires no fixings. As it can be used repeatedly, it provides a more professional and cost effective solution than plywood.

On muddy, sandy or grass surfaces, Portapath brings pathways and flooring solutions which sustain rugged assignments. An excellent all weather, all year round surface, providing an innovative and reliable alternative to traditional flooring systems such as plywood. **Portapath** is easy to handle, simple to install and allows installation to be customised for each occasion, reducing time spent on site.

Terraturf is one of the "budget" range manufactured in the UK by Terraplas plc – the World's No. 1 Turf Protection company. It is designed for pedestrian use to provide access and protection to sensitive grounds during construction activities, helping prevent environmental destruction. It allows the passage of air and light and each tile overlaps its adjacent tiles to prevent rubbish and non-desirable liquids from passing through to the turf – whether natural or artificial.

Caravan Park Flooring

For those occasions where a more permanent application is required, we suggest using one of our CORE products.

COREgrass ground stabilisation recycled panels are made from 100% recycled polypropylene (PP). With super strong ground stabilisation, it provides enhanced load bearing and causing no rutting, separating or sliding with vehicle traffic. It's environmentally porous structure allows the rain to drain over the entire surface, and is ideal for your car park or path solution.

COREgravel ground stabilisation recycled panels, are made from 100% recycled polypropylene (PP). Part of a natural porous paving system, just add gravel to the interlocking panels of hexagon cells and you have an eco-friendly surface that costs less than asphalt, concrete or block pavers. It is super strong, and the enhanced load bearing causes no rutting, separating or sliding with vehicle traffic.
