Corebond for Driveways, Car Parks and Walkways

COREbond gives you all the beauty and benefit of natural porous paving, combined with the durability and ease-of-use. The strengthening honeycomb base allows you to use two thirds less aggregate and is available in choice of stone finishes.

COREbond's unique 2-layer design consists of a plastic honeycomb base that provides strength and durability, topped with your choice of natural stone bound together with a flexible epoxy resin.

Installing **COREbond** is quick and easy due to the interlocking base panel design – simply clip the tiles together to create a porous, SUDS compliant surface that is perfect for:

- Patios
- Pathways
- Pool surrounds
- Driveways & car parks
- Decorative landscaping
- Golf cart paths, and more!

COREbond Paving Tiles Benefits

- Easy-to-use - No need for messy resins or fumes, the interlocking panels ensure quick, low cost installation
- Low cost - **COREbond's** strengthening honeycomb panel allows you to use up to two thirds less aggregate
- Eco-friendly - The unique design allows water to drain across the entire surface, providing a porous surface far superior to that of a resin bound 'gravel only' solution
- Flexible - The resin used to produce the **COREbond** panels is flexible so won't crack as a result of surface movement or extreme weather, reducing site liabilities and costly repairs
- Non-slip - **COREbond's** top layer is designed to be 'non-slip' making it ideal for gradient surfacing
- Beautiful - With a wide choice of natural stone finishes **COREbond** will add beauty to any installation
