Coregrass for Golf Courses

In the hot Australian climate, damage can be caused by carts driving over severely stressed turf.

Our **COREgrass** ground stabilisation recycled panels provide a natural porous, low-cost solution that can stand up to the traffic of carts, buggies and pedestrians.

COREgrass – for all your car parks, cart tracks and walkways that are “below par”.

COREgrass is environmentally friendly in design, function and material. Many plastic grass grids on the market lack the strength necessary to last and absorb high levels of traffic; not so with our Honeycomb design!

A proprietary interlocking system and manageable sized sheets make for easy installation. **COREgrass** is Ideal for use in hardscapes or landscapes where you need the porosity and beauty of natural grass. Main uses include anywhere you would use grass paving.

COREgrass	50-35	60-40	65-45
Cell diameter	50 mm	60 mm	65 mm
Panel size	1200 mm x 800 mm	1000 mm x 1150 mm	1150 mm x 800 mm
Panel thickness	35 mm	40 mm	45 mm
Strength	150 tonne/m ²	250 tonne/m ²	350 tonne/m ²
Weight (empty)	0.9 kg / panel 2.8 kg / m ²	1.1 kg / panel 4kg / m ²	1.5 kg / panel 5.3 kg / m ²
Material	Polypropylene (PP)	Polypropylene (PP)	Polypropylene (PP)
