## Coregravel for Walkways

It is super strong, and the enhanced load bearing causes no rutting, separating or sliding with vehicle traffic.

**COREgravel**/Turf Ground Stabilisation is the core of hassle-free gravel and turf paving stabilisation for all types of vehicle or pedestrian traffic with no compromise in strength and durability. Part of a natural porous paving ground stabilisation system, just add gravel or turf to the interlocking panels of hexagon cells and you have an eco-friendly ground stabilisation surface that costs less than asphalt, concrete, or block pavers.

**COREgravel** solves the problems of aggregates without ground/turf stabilisation sinking, migrating, and forming ruts.

The hexagon cells that make up each **COREgravel** panel form a rigid honeycomb design that holds gravel in place providing maximum load bearing.

The underside incorporates a durable geotextile, which allows water to drain easily and prevents weed growth. All panel edges have an interlocking system that makes for easy installation, even on steep grades.

## Coregravel for Walkways (cont)

### Coregravel Ground Stabilisation Benefits

- **Stabilise gravel and turf.** Get gravel/turf to stay put, no ruts, no sinking, no problems.
- **Low cost.** Because the gravel/turf won't move around you can use less, giving you a porous service that costs less than concrete, asphalt or block pavers.
- **Super strong ground stabilisation providing** enhanced load bearing causes no rutting, separating or sliding with vehicle traffic.
- **No weeds.** The geotextile backing underneath each panel prevents weed growth.
- **It's green.** Environmentally friendly porous gravel paving allows the rain to drain over the entire surface.
- **SUDS compliant.** Because COREgravel is porous it is ideal for solutions requiring a Sustainable Drainage System.
- **ADA compliant.** Ideal for pedestrians, bicycles, & wheelchair traffic.
- **Beautiful.** When filled the product is practically invisible, leaving you with a stunning surface that is easy to maintain.
- **CORE marker.** Easily add parking lines and edge indicators with COREmarker.
