GENERAL ADVANTAGES OF USING MATS

1. Decrease Plant and Rig Maintenance
 - Set up time for rigs is less.
 - Safer controlled environment.
 - Less down time.
2. Work through winter break is possible
 - Extends season.
 - Results for faster production.
3. Inclement Weather
 - Eliminate effects of unpredictable weather.
4. Superior working conditions
 - Staff morale is higher due to safe working conditions.
 - Brings stable secure working staff.
 - Improved staff morale, more efficient work force.
5. Safety Issues
 - Eliminate rutting of lease sites, reduces tripping hazards.
 - Stable more efficient working platform for equipment.
 - Ease of movement, no tow equipment necessary.
6. Reduce Lease Size
 - Has the potential to reduce lease size.
 - No storage for fill required.
7. Environmental Management
 - Solid Waste Handling - when dealing with invert cuttings, the use of matting significantly reduces the total volume that has to be treated or land filled by as much as 30%.
 - Significant reduction in fluids used, the rigs stays cleaner and therefore less fluids used to wash.
 - Long term liability reduction— eliminates admixing of soils by less soil disturbance and reduction in reclamation certification timelines.
