Gym Wall Padding

Covermaster protective padding products improve the safety and appearance of areas with the potential for participant injury due to wall collision. Further enhance your branding by choosing the option of displaying your logo or advertising

Covers are made of highly tear resistant vinyls available in a range of standard and custom colours. Most pads can also be supplied with wood backing. Foam cores are made of cross-linked polyethylene and polyurethane and they are available in various thicknesses and densities, depending on individual needs. Enhance your interior walls with safety and sound proofing
