Recycled Plastic for Boardwalks

Landscapers prefer this material because it is rot and algae-proof, splinter-free, resistant to vandalism, UV- resistant and light and easy to install. This makes the Centriforce recycled plastic profiles perfect for that boardwalk.

Benefits

- Manufactured from 100% recycled plastic
- Offers significant long term cost savings compared to timber
- Environmentally friendly
- Can be used both indoors and outdoors
- Rot proof, water resistant, tough and durable
- Helps meet corporate social responsibility targets
- Can be used several times and is 100% recyclable
