Recycled Plastic for Signs

Stokbord® is an extremely tough and durable, general purpose, value for money board manufactured from 100% recycled plastic. It provides significant long term cost savings, as it does not rot, and once installed requires little or no upkeep.

It can be fabricated and welded for a variety of landscape applications, including:

- Garden Beds
- Kids play area base and surrounds
- Cubby houses
- Privacy screens
- And much more ...

Benefits

- Extremely tough and durable
- Rot proof - unaffected by water / animal waste
- Chew resistant - non toxic
- Hygienic - steam or pressure clean
- Easy to fabricate - **Stokbord®** can be welded, routed and cut
- Highly resistant to chemicals

Stokbord® has a unique embossed surface pattern on both sides which provides good scratch resistance. A smooth surface sheet is also available.

Stokbord® is supplied in standard size sheets of 2440mm x 1220mm with a thickness of 6, 9 or 12mm and is available in black or grey. Other sizes are available on request.
